Green credentials

Made in the Netherlands, BiOBUDDi building blocks are a breakthrough for the toy market, they are the world's first eco-friendly interlocking bricks!

This new biobased material is derived from the leftovers from sugar cane production instead of oil, making the blocks environmentally friendly.

The packaging, stickers and activity books are also eco-friendly.

Stickers and activity books are included in the BiOBUDDi box to help stimulate children's curiosity to explore and learn through play.

The blocks are compatible with building blocks of other brands.

Education sets contain: 240 blocks, 4 base plates, 18 learning books.

Q&A

What are the BiOBUDDi building blocks made of?

BiOBUDDi building blocks are made from leftovers of the sugarcane plant, a sustainable and environment friendly solution.

What is the difference between these building blocks and other brands?

BiOBUDDi building blocks are made from plant leftovers - so they are biobased. This helps to promote and create a sustainable environment.

Are the building blocks safe for young children?

All the sets that [Early Years Direct](#) supply are suitable from 18m+

Are these building blocks as durable as those of different brands?

BiOBUDDi building blocks are sturdy and last generations.

Are the BiOBUDDi building blocks compatible with other brands?

Yes! The size of BiOBUDDi building blocks matches different brands.

My set is incomplete or damaged, what do I do?

Contact [Early Years Direct](#): call 0845 603 3195
or email emma@earlyyearsdirect.com

BiOBUDDi products are recyclable, but where do I send them to?

The recycling process is the same as the regular polyethylene recycling.

How can I tell the difference between biobased building blocks and other plastic blocks?

Our building blocks have a BiOBUDDi mark. Colour and texture are similar.

What kind of influence do these building blocks have on children?

Building blocks help children's development. They stimulate creativity and imagination. They develop spatial awareness and fine motor skills.

Is the packaging of the products environment friendly as well?

All our packaging is approved by FSC. This certification ensures responsible sourcing and helps forests thrive for generations to come.

Are the stickers used on the products biobased?

Yes, they are made of the leftovers from sugarcane plants.
